## **EXECUTIVE SUMMARY**

### **2015 Year End**

Approximately one-third of the arrests made in Los Angeles County (County) result in an arrestee being booked into the Los Angeles County Sheriff's Department (Department) jail system. In 2015, 304,288 arrests resulted in 112,538 bookings into the jail system. The resultant inmate population was comprised primarily of men (87 percent) aged 18-34 years-old (57 percent). The racial demographic of the jail population was 49 percent Hispanic, 30 percent African-American, and 17 percent White. Detailed demographic data can be found on pages 23 and 24 of this report.

Approximately 53 percent of the inmate population was comprised of pre-trial inmates; those awaiting trial or sentencing on one or more cases. The sentenced population was evenly split between inmates traditionally sentenced to County jail time (approximately 19 percent) and those sentenced to County jail under AB109 (approximately 19 percent)<sup>1</sup>. Nearly 700 inmates, approximately 4 percent of the population, were housed awaiting transfer to the California Department of Corrections.

The average daily inmate population (ADIP) of the County Jail system in 2015 was approximately 17,900. This number includes approximately 800 inmates who were serving their sentences outside of the jail in community based alternatives to custody programs. This is a significant decrease from the 2014 average ADIP of 18,680.

The passage of Proposition 47 in November 2014, affected the jail population in numerous ways. The law, which reclassified many crimes from felonies to misdemeanors, resulted in a reduction of the number of inmates booked into the jail system and an increase in inmate releases. As a result, there was a dramatic initial decrease in the ADIP in December 2014 and into early 2015. The Department used this period of low ADIP to remove non-traditional bunks from some overcrowded housing units and to complete necessary facility maintenance projects which would have been more difficult to accomplish during periods of crowding.

The Rutherford Federal Lawsuit, which has been in effect for decades, grants the Sheriff authority to manage the jail population during periods of overcrowding. The Department accomplished this by adopting a percentage release policy. During most of 2014, the majority of inmates serving Traditional County Sentences (TCS) were released from jail after completing between 10-20 percent of their court ordered sentences. Inmates serving TCS sentences for serious and/or violent offences (M7 charges) were released after serving 70 percent of their court ordered sentences. The lower ADIP seen as a result of Proposition 47 allowed the Department to reduce its use of percentage release. In 2015, the release percentage ranged from as high as 90 percent for TCS inmates during the First Quarter of the year, to as low as 40 percent by years end.<sup>2</sup>

---

<sup>1</sup> There was a significant increase in the pre-trial population over the course of 2015. This was likely the result of Proposition 47 which lowered the average time to serve for inmates sentenced for drug and property crimes. There was also a reduction in the AB109 population as many non-violent offenses were reduced from felonies to misdemeanors. See page 21 for additional information.

<sup>2</sup> The Rutherford decision grants the Sheriff the ability to release inmates prior to the completion of their court ordered sentences only when conditions of overcrowding exist. As a result, the Sheriff was required by law to adjust the percentage release policies due to the reduction in the ADIP following the passage of Proposition 47.

Inmates who were convicted under AB109 or those sentenced for serious and/or violent crimes served 100 percent of their court ordered sentences throughout the year. Further information regarding early release practices can be found on page 9 of this report.

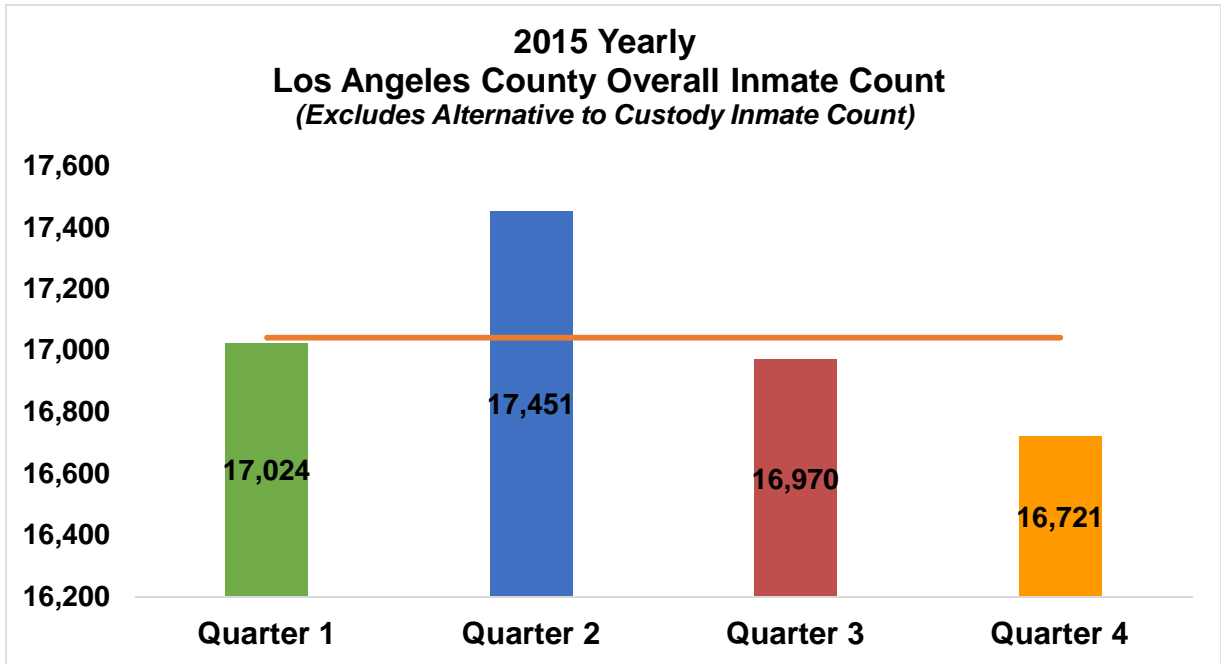

While the overall jail population decreased in 2015 from previous years, the number of inmates who required mental health treatment steadily increased; growing approximately one percent per quarter. By years end, 24 percent of the inmate population was receiving some level of mental health treatment. Many of these inmates were too ill to be safely housed in a multi-person cell and were housed alone. This made the second bed in these multi-person cells unavailable for use. The loss of bed space caused crowding in general population housing areas. Relief for this crowding often necessitated an expansion of the percentage release policy.

The number of in-custody programs offered to the inmate population increased throughout 2015, as did inmate participation. On average, 37 percent of the inmate population participated in Education Based Incarceration Programs; with participation showing a steady increase from 32 percent during the First Quarter to an impressive 42 percent during the Fourth Quarter, which equates to an increase of more than 1,600 additional inmates in programs. These participation numbers should continue to increase as the in-custody Substance Abuse Treatment and Reentry Transition (in-custody START) program is anticipated to begin in early 2016. In-custody START is a collaborative effort between the Department and the Department of Health Services – Substance Abuse Prevention and Control (SAPC). Participants in in-custody START will be identified by the Department and evaluated for substance abuse disorder (SUD) services by a SAPC contract provider. Inmates appropriate for a treatment in a SUD program will be provided with treatment services based upon the intensive residential treatment model offered in community based programs. In-custody START will begin as a 50 person pilot program with the goal of expanding to a total of 800 inmates receiving treatment every 90 days, approximately 3,200 inmates per year.

Alternative to Custody (ATC) treatment programs also expanded during 2015. In collaboration with SAPC, the ATC START program began in July. Through this program, sentenced female inmates serve the final 90-120 days of their sentences in community based residential drug treatment. Inmates who participate in this program are monitored via GPS. The ATC START is also expected to expand and will begin admitting male inmates into the program during the First Quarter 2016. Also anticipated to begin in 2016 is the ATC “Normandie Village” project. A collaboration between the Department of Mental Health and the Department, Normandie Village is community based mental health and substance abuse treatment program targeted toward sentenced male inmates with mental illness. Inmates enrolled in this program will have less than 6 months to serve on their sentences, will have low to moderate risk scores, and will have a mental illness which is in stabilized condition. Normandie Village will be a supervised program. Supervision and security will be present at the facility 24 hours per day and the inmates will be monitored by GPS.

## AB109 Split and Non Split Sentence

Under AB109, judges can impose a “split sentence” when sentencing a convicted defendant to time in jail. A split sentence requires a portion of the sentence served in custody, and a portion of the sentence served under supervision of the probation department in the community. The Split Sentence option in sentencing results in a shorter stay for inmates.

## 2015 YEARLY - BOOKINGS VS. RELEASES

The Department released 117,977 inmates in 2015. The ratio of Booking vs. Releases increased each quarter with the exception of fourth quarter.

## LA COUNTY JAIL RELEASE PRACTICES FOR 2015

For more than a decade, LASD has relied heavily on early release practices to comply with the Rutherford decision. Utilizing the “Percentage of Time Served” release system, LASD essentially releases inmates before the completion of their court ordered sentence. While early release is currently applied to Traditional County Sentenced (non-AB109) inmates, the program provides significant population relief for the LASD jail system.

## CLASSIFICATION AND RE-CLASSIFICATION

The Department utilizes the Northpointe Classification system to assign security levels to inmates. The security levels guide where an inmate will be housed based on their individual risk for in-custody misconduct. Lower security housing areas offer more programming and privileges to better prepare the inmates for release. Higher security housing is more restricted and therefore limited in what programs are offered, due to potential risk of serious misconduct and/or escape by the high security level inmate population.

\*K-10 (Ad-Seg) inmates are re-evaluated for reclassification of security level during the re-class process which occurs every 45 days. This chart only includes inmates housed in LASD Type II facilities. Does not include inmates housed in alternative custody beds. ^Average 16,552 differs from facility ADIP of 16,546 due to time query was ran.

The pie graph above depicts the average number of inmates housed in 2015 by security level. The percentage is calculated to the Facility ADIP for 2015 (16,552).

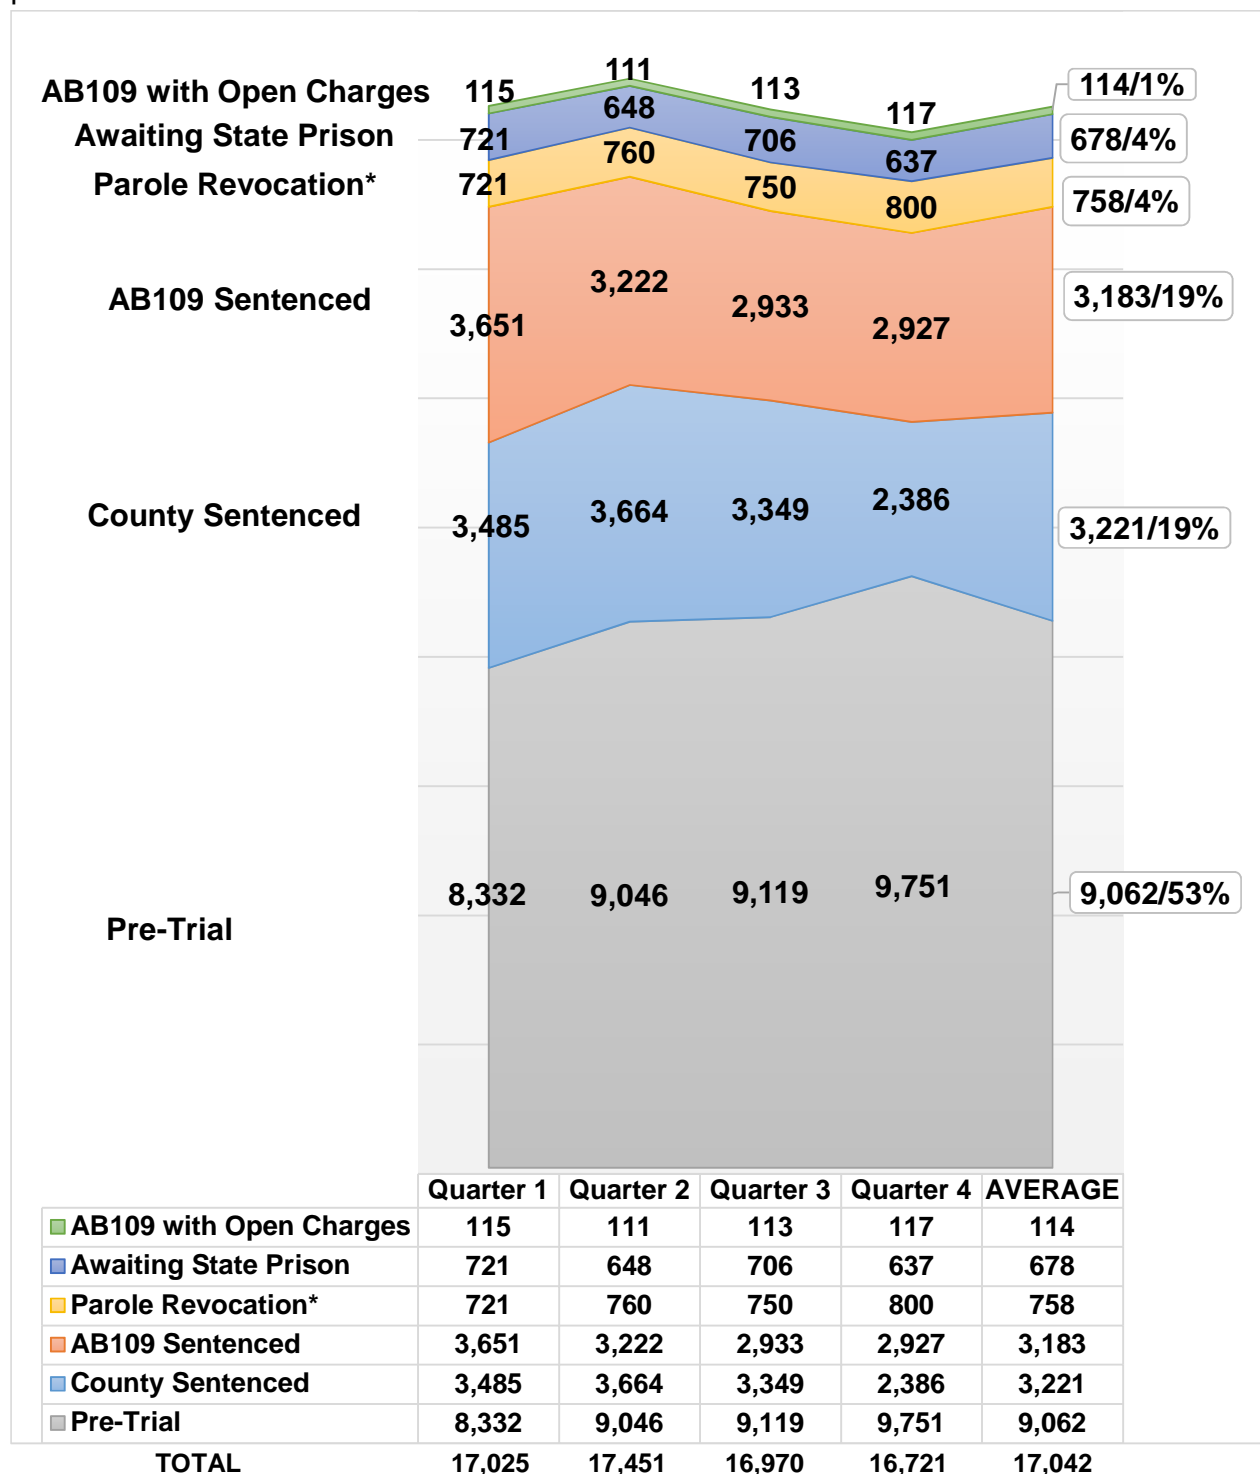

## RE-CLASSIFICATION STATISTICS

Inmates are periodically reclassified (approximately every 45 days) to determine if their security level is still appropriate or should be reduced or increased based upon their conduct.

## INMATE POPULATION BREAKDOWN

The inmate population consists of various categories of inmates in broad groupings, including: pre-trial, traditional county sentenced, AB 109 sentenced, AB109 sentenced with additional charges, parole/revocation violators, and those awaiting transfer to State prison.

*Parole Revocation includes PRCS Revocation 3455, Flash Incarceration 3455 and Inmates with a 3056 hold.*

## **INMATE POPULATION BREAKDOWN CONTINUED**

- **AWAITING STATE PRISON**
  - During 2015, an average of 678 inmates were awaiting transfer to state prison, some while pending trial on other cases.
  
- **AB109 PAROLE AND PROBATION VIOLATORS**
  - An average of 758 AB109 inmates were in custody for violating their parole or probation.
  
- **AB109 SENTENCED**
  - An average of 3,183 inmates were in custody, sentenced under AB109. An additional 114 inmates are AB109 with Open Charges.
  
- **TRADITIONAL COUNTY SENTENCED INMATE POPULATION**
  - The average daily count for the traditional county sentenced (TCS) population was 3,221, approximately 19% of the inmate population.
  
- **PRE-TRIAL INMATE POPULATION**
  - During 2015, there were approximately 112,538 new bookings into the County jail. Fifty-three percent (53%) of the average daily inmate population (17,042) was comprised of inmates who were pre-trial. Pre-trial inmates are those who have an open case and have not been sentenced by the courts.

## **INMATE POPULATION DEMOGRAPHICS**

Racial demographics for 2015 indicate the three most populous racial groups within the LA County Jail for both male and female offenders are Hispanic (49%), Black (30%), White (17%), and Other (4%).

## MENTAL HEALTH INMATE POPULATION

In 2015, the average inmate population was 17,042; the mental health population accounted for 22 percent of this population. Currently, inmates identified with Mental Health needs requiring specialized housing moderate or high observation housing, account for 18 percent of the overall population. The remaining 4 percent of the mental health population have been treated and continue to receive psychotropic medication while housed in general population.

## AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) housing is used to accommodate inmates with mobility limitations and/or physical disabilities. This year the average number of inmates requiring ADA is 157.

# **IN-CUSTODY PROGRAMS**

## **INMATE IN-CUSTODY PROGRAMS**

The County Jail offers several in-custody programs. Programs vary from a number of in-custody work assignments, vocational job training, education, and life skill classes, as well as fire camp training and California Department of California Rehabilitative fire camp placement for AB109 inmates. Various programs award sentenced inmates' additional time credits for their participation pursuant to the California Penal Code:

### **CONSERVATION WORK PROGRAM (CWP)**

The Conservation Work Program (CWP) allows inmates to complete their adjusted sentence while working in various job classifications, giving them the skills and work discipline necessary to increase their chances of success once released. Effective January 2015, all sentenced offenders, including Traditional County Sentenced (TCS) inmates are eligible to receive credits pursuant to Penal Code Section 4019.1. For 2015, approximately 2,500 offenders (15% of the population) participated in CWP.

## **FIRE CAMP TRAINING PROGRAM**

Fire Camp Training and California Institute for Women (CIW/CSCR) training are aligned under the Conservation Work Program (CWP). This program is the first step of training before an inmate may participate in a State facilitated Fire Camp Program. Offenders who are sentenced under AB109 are eligible to receive credits pursuant to Penal Code 4019.1. The average number of inmates enrolled in the Fire Camp training program for 2015 was 245.

Once an inmate passes all necessary requirements in the Fire Camp Training Program located at PDC East facility, they are transferred to one of five state contracted fire camp sites where they will serve the remainder of their adjusted sentence. Offenders who are sentenced under AB109 are eligible to receive credits pursuant to Penal Code 4019.2. The average number of inmates assigned to CDCR Fire Camps for 2015 was 440.

## EDUCATION BASED INCARCERATION PROGRAMS (EBI-MILESTONE)

The Education Based Incarceration Program (EBI) uses traditional and nontraditional education which is designed to reduce incarceration by increasing the educational, civic, social, economic, and life skills of its participants. Offenders who are sentenced under AB109 are eligible to receive credits pursuant to Penal Code 4019.4. In 2015, approximately 24,488 inmates participated in the EBI program. A total of 2,892 Milestone credits were awarded this year.

### **BACK ON TRACK PROGRAM**

The Back on Track (BOT) program began February 2015 and is overseen by EBI staff. The program delivers education and comprehensive reentry services to offenders before and after a participant is released from jail. The program focuses on the critical time following an inmate’s release from jail, by providing the seamless reentry services vital for success, including employment and life skill services. This program is available to inmates who have been sentenced under AB109 and are eligible to receive Milestone credits. They must be enrolled in the program for 18 months—divided into 9 months in-custody and 9 months out-of-custody.

# **ALTERNATIVES TO CUSTODY**

The Community Transition Unit (CTU), the Community Based Alternatives to Custody Unit (CBAC), and the Compliance Team work together by utilizing a variety of alternatives to custody programming options in an effort to enhance an inmate's chance of success upon release. These programs are conducted in collaboration with local agencies including Community and Faith Based Organizations, Department of Mental Health (DMH), Department of Public Health (DPH), and other organizations. It is the Department's goal to program inmates from intake through re-entry into the community. With this approach, we hope to increase public safety and reduce the rate of recidivism.

### **COMMUNITY TRANSITION UNIT (CTU)**

Supported by release planning overseen by the CTU, and in partnership with contracted services, inmates are provided re-entry assistance through linkages to services that are initiated while they are in-custody and continue upon release. Through the Alternatives to Custody (ATC) programs, designated inmates are afforded the opportunity to complete the remaining portion of their sentence in a community treatment program.

Individuals who meet necessary qualifications are placed into a residential treatment program. Inmates who do not qualify for ATC due to security or other reasons are referred to community providers for re-entry assistance.

### **SUBSTANCE ABUSE TREATMENT AND REENTRY TRANSITION (START)**

In 2015, the Department and the Department of Public Health launched the Substance Abuse Treatment and Reentry Transition (START) program. This two-phase program involves in-custody drug education and community based residential treatment. Enrollment information for the START-ATC program is provided below.

## COMMUNITY BASED ALTERNATIVES TO CUSTODY (CBAC)

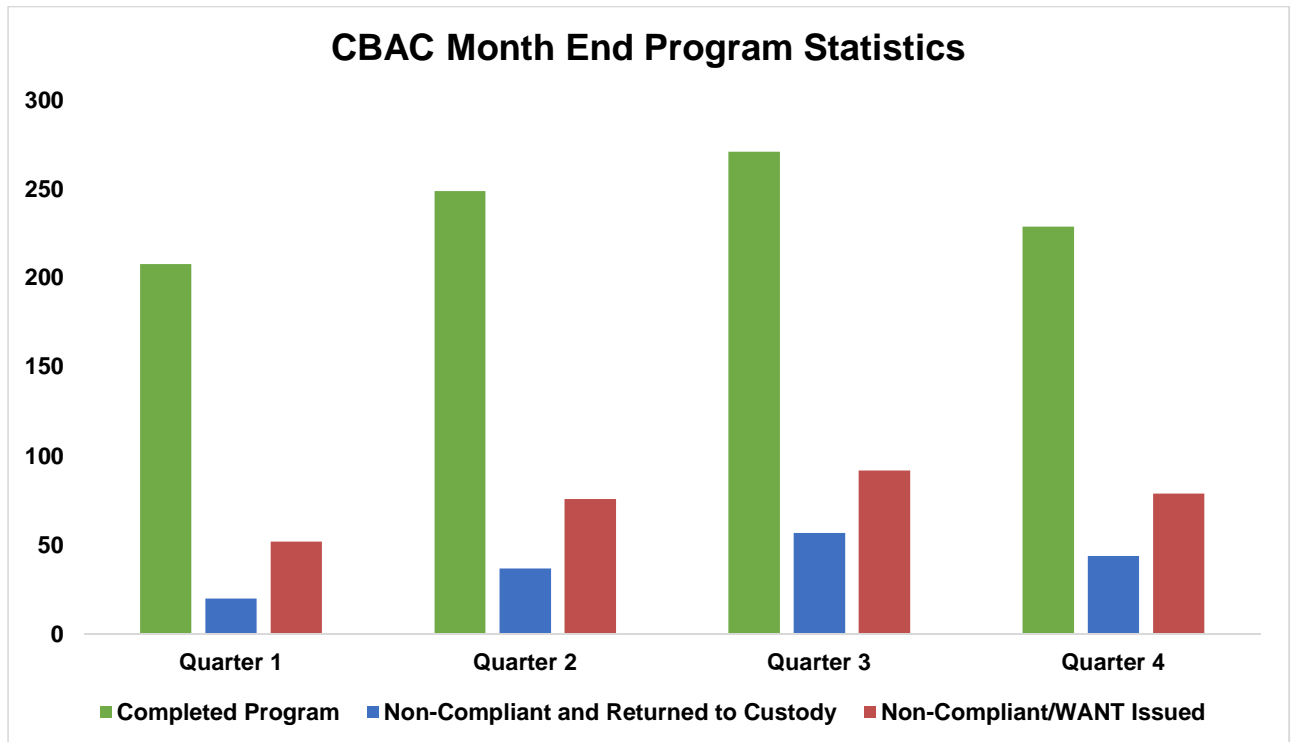

The PMB's CBAC unit identifies low risk sentenced offenders within the jail population who qualify to finish their remaining sentence in an out-of-custody alternative environment. Although these individuals are outside of traditional custody, they are still under the jurisdiction of the Department.

\* Data Entry Error

The graph below depicts the total number of offenders who successfully completed the remainder of their sentence on a CBAC program. It also shows the number of offenders who failed to complete the program and with the efforts of the PMB Compliance Unit, were returned back to finish their sentence and those who failed to complete the program and were not returned back to custody.

## CTU COORDINATED RELEASES TO VARIOUS PROGRAMS

The final 90 days leading to an inmate's release from custody are the most critical in ensuring a successful transition from Custody to Community Based Organization (CBO) Treatment Centers. During the time leading up to their release; inmates are interviewed several times by the CBO Staff and members of the Community Transition Unit to ensure that they are matched up with a suitable treatment provider.

The coordinated release process helps to create a trust between law enforcement, inmate participants, and CBO's. The CTU's ultimate goal is to provide a successful recovery and re-entry into the community and to ultimately decrease in recidivism.

	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Average
Coordinated Releases	53	56	134	112	89
Regular Releases	9,500	9,926	9,970	9,930	9832

## CTU VITAL RECORDS

Through the Vital Records Program, Department staff members have been deputized by the County Registrar-Recorder to facilitate birth certificate applications for inmates born in Los Angeles County, who have requested a certified copy. The fee of \$28 for certified copies of birth certificates is funded by the Inmate Welfare Fund.

All inmates in custody are eligible to apply for a California ID Card. The issued ID's are provided to the inmates upon their release. The inmates must still report to the DMV to obtain a driver license following their release.
